General

- duration : 40 minutes
- number of people on tour: 5
- location : preferably outdoors also possible indoors or in a circus tent
- conditions : not possible when raining
- transport : one vehicle with trailer

Pitch

- minimum 8m x 8m. 7m free height. Hard, stable, flat and dry surface. When performed on grass the organiser has to provide a wooden stage floor (type cassette floor or stage elements that can be levelled).The Chinese pole requires a surface with 1000kg weight capacity at base point
- when there is no possibility to use pegs (in case of hard surface, irrigation system, no permission,...): 3 anchor points of minimum 350kg each. Concrete blocs, water tanks or weight blocs. Preferable on a wooden pallet to prevent sliding. Please see attached plan for specific details
- build up : 30 minutes, tear down : 30 minutes
- possibility of loading and unloading nearby the pitch
- the pitch has to be available for the artists to warm up 20 minutes before the start of the performance

Music

- music controlled by artists
- plug 220V on the backside of the stage
- copyrights to be provided by the organiser, playlist on request

Lights

- if the show has to be performed in the dark or by twilight the organiser has to provide lighting. Lighting information available by request.

Other

- one person provided by the organisation to assist with accesories and props nearby the pitch to be used during the performance
- dressing room with showers and safe storage for the artists personal belongings
- 2 liter bottled mineral water per artist
- pyrotechnic effects are used during the show. Information and technical rider on request.
